## OW2 Unveils CHOReVOLUTION Studio for IoT and Web services-based applications

*At Cloud Computing World Expo 2016, OW2 showcases CHOReVOLUTION Studio, an Integrated Development Environment to develop large-scale applications that integrate IoT and web services.*

**Paris, France, March 23, 2016** - OW2, the global community for open source infrastructure software and application platforms is exhibiting at Cloud Computing World Expo, March 23-24, in Paris, Porte de Versailles Hall 5.1. The international association announces the alpha release of **CHOReVOLUTION Studio**, an open source outcome of the H2020 CHOReVOLUTION project.

CHOReVOLUTION Studio is an Eclipse IDE (Integrated Development Environment) that helps develop applications based on **automated synthesis of fully distributed, dynamic and secured choreographies**. The innovative CHOReVOLUTION Studio allows the transparent reuse of existing software services, and the automated generation of connectors for composing and coordinating these services.

Learn more about CHOReVOLUTION in the **Open Cloud Village and OW2 booth G07**, at Cloud Computing World Expo 2016 Paris, and during both *Open Cloud Forum by OW2* sessions:

1- Sébastien KELLER, CHOReVOLUTION project coordinator, gives a talk on the project objectives and first results after one year of R&D, **March 23, 2016 at 14:00** (Amsterdam room).

2- Sébastien KELLER will also join the round table “Securing cloud access and providing end-to-end traceability”, with Benoît MORTIER, CEO of OpenSides and Clément OUDOT, Security expert at Savoir Faire Linux, **March 23, 2016 at 16:00** (Amsterdam room).

Visit the **OW2 booth G07** at Cloud Computing World Expo 2016, and ask for a CHOReVOLUTION presentation. Take this opportunity to **win a connected watch**. To validate your participation, attend at least two more presentations on the Open Cloud Village: ActiveEon ProActive, AppHub, Nanocloud and OCCLware. The draw will take place on March 24 at 16:00.

### About CHOReVOLUTION

CHOReVOLUTION provides a development environment to design innovative applications in areas such as smart cities and intelligent transportation systems. It integrates existing services, connected things and new services through fully distributed choreographies. The CHOReVOLUTION Project is developed by a consortium of eight partners and has received funding from the European Union’s Horizon 2020 research and innovation programme. The CHOReVOLUTION software will be published under an open source licence and be publicly made available through the OW2 community. For more information on the project, please visit the website: <http://www.chorevolution.eu/>

### About OW2

OW2 is an independent industry community dedicated to developing open source code infrastructure (middleware and generic applications) and to fostering a vibrant community and business ecosystem. The OW2 Consortium hosts some one hundred technology projects, including ASM, Bonita, CLIF, CompatibleOne, DocDoku, Emerginov, erOCCI, JOnAS, JORAM, Lutece, Nanoko, OpenPaas, ProActive, SpagoBI, Talend Studio, WebLab, XWiki. Visit [www.ow2.org](http://www.ow2.org)
