Press release FOR IMMEDIATE RELEASE

At EclipseCon Europe 2016, OW2 is Showcasing the CHOReVOLUTION Platform, Attuning Business Services and Connected Things

Developers can check how the Eclipse-based CHOReVOLUTION Studio integrates existing and new web/IoT services through fully distributed choreographies on OW2 booth #4.

EclipseCon Europe, Ludwigsburg, Germany, October 25, 2016 - OW2, the global community for open source infrastructure software, is showcasing the CHOReVOLUTION open source Studio, a new Eclipse-based IDE for service providers and IoT business users.

Visit OW2 **booth #4** and ask for a demonstration of this innovative platform, a direct result of the European Union's Horizon 2020 research and innovation programme.

"*The CHOReVOLUTION technologies cover all the steps from inception, to design, implementation and deployment in the cloud. First use cases are related to Urban Traffic Control and Smart Tourism* " explains Amleto DiSalle, Researcher from L'Aquila University, and EclipseCon Europe 2016 speaker.

 On Wednesday, October 26, 2016, from 4:00pm to 4:35pm in room Wilhelm-Krämer, Amleto DiSalle, Researcher from L'Aquila University will give more technical details about the CHOReVOLUTION platform. Join him in the EclipseCon Europe 2016 IDE, & DevOps track, at the following session:

Compose and run new services without programming experience, with CHOReVOLUTION Eclipse-based Studio.

Leveraging BPMN2 diagrams and modelling, the CHOReVOLUTION integrated developer environment provides a dynamic and secure choreography of web services, without requiring multithreading skills.

Cloud service providers, and Web/IoT service designers can find more information reading the project factsheet and the white paper. Developers will grab more technical details on the project's forge and on the documentation section of the website (Use menu): http://www.chorevolution.eu.

About CHOReVOLUTION
CHOReVOLUTION provides a development environment to design innovative applications in smart cities and intelligent transportation systems. It integrates existing services, connected things and new services through fully distributed choreographies. The project is developed by a consortium of eight partners and has received funding from the European Union's Horizon 2020 research and innovation programme. The CHOReVOLUTION software is publicly available through the OW2 community. More: http://www.chorevolution.eu/

About OW2
OW2 is an independent community dedicated to developing open source software infrastructure and to fostering a vibrant community and business ecosystem. The OW2 Consortium hosts some one hundred technology projects, including ASM, Bonita, Chameleon, CLIF, DocDoku, Easybeans, Emerginov, Fractal, FusionDirectory, JOnAS, JORAM, JOTM, LemonLDAP:NG, Lutece, PetalsESB, Prelude, ProActive, SAT4J, Spagic, Spago4Q, SpagoBI, Talend Studio, Telosys, WebLab, XWiki.
